**"Execute Against Japan"** Joel Ira Holwitt 2009-04 Less than five hours after the Japanese attacked Pearl Harbor, U.S. naval leaders reluctantly chose to pursue a form of warfare they despised—targeting not only Japanese military assets but also civilian-operated fishing trawlers, freighters, and tankers. The move to unrestricted submarine warfare represented a major change in the longstanding American adherence to the classic doctrine of "freedom of the seas," under which commercial vessels were held to have the right to navigate the oceans without threat of attack. This dramatic about-face in naval policy, potentially as controversial ...

**Battlecruisers** John Roberts 1997 This second volume in the *ShipShape* series covers the development of one of the largest, fastest and most charismatic warship types. Combining the armament of a battleship with the speed of a cruiser in some of the largest hulls then built, these ships were the cutting edge of early 20th-century naval technology. The brainchild of Admiral Fisher, the concept of this class began as large, fast armoured cruisers for trade protection, but the last-minute decision to equip them with 12-inch guns led them to be seen as a high-speed element of the battle fleet. The British battlecruisers fought in numerous battles in World War I, such as the battles of the Falklands, Heligoland Bight and Dogger Bank. But it is for the battle of Jutland in 1916, when three battlecruisers exploded and sank in one day, that these ships are best remembered.

**The Revenge of the Real** Benjamin Bratton 2021-06-29 The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? *The Revenge of the Real* envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention.

**The Voyage of the CSS Shenandoah** William C. Whittle 2005-05-08 "The Confederate cruiser *Shenandoah* was the last of a group of commerce raiders deployed to prey on Union merchant ships. Ordered to the Pacific Ocean to "greatly damage and disperse" the Yankee whaling fleet in those waters, the *Shenandoah's* successful pursuit of her quarry compares favorably with the exploits of the more celebrated *Alabama* and *Florida* but has never been as well known because it coincided with the war's end. It was, however, one of the best documented naval expeditions - from England to the Indian Ocean, Australia and the South Pacific, the Bering Sea, San Francisco, and finally to port in Liverpool - during the Civil War."--BOOK JACKET.

*From Bloodshed to Hope in Burundi* Ambassador Robert Krueger 2007-10-01 The story of Burundi is not simply about Africans or Americans, but about all of us. Compelling and heartrending account of Ambassador Krueger and his wife. *Twenty-Three Minutes to Eternity* James L. Noles 2004-02-23 A long-overdue history of America's "forgotten flattop." On November 24, 1943, a Japanese torpedo plunged into the starboard side of the American escort carrier USS *Liscome Bay*. The torpedo struck the thin-skinned carrier in the worst possible place the bomb storage area. The resulting explosion could be seen 16 miles away, literally ripping the *Liscome Bay* in half and killing 644 of her crew. In terms of lives lost, it was the costliest carrier sinking in United States naval history. *Liscome Bay's* loss came on her first combat

operation: the American invasion of the Gilbert Islands. Despite her short career, she touched a number of remarkable and famous lives. Doris Miller, the first black American sailor to win the Navy Cross, lost his life, as did Rear Admiral Henry Mullinax, one of the Navy's first "air admirals." John Crommelin was the senior officer to survive the sinking. Later in his career, Crommelin, a decorated naval aviator himself, sparked the famous Revolt of the Admirals, which helped save the role of naval aviation in America's Cold War military. James Noles's account of the Liscome Bay and those who served aboard her is based on interviews with the ship's survivors and an unpublished memoir that the ship's pay officer made available to the author. This readable, compelling book pays homage to the crew by telling their story of experience and sacrifice. To follow Jim Noles on Twitter, access his stream here:

*Pre-Incident Indicators of Terrorist Incidents* Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
