**Commanding an Air Force Squadron** Timothy T. Timmons 1993 Obviously directed at Air Force readers, Colonel Timmons's book - because of its aphoristic, anecdotal, concrete approach - will speak to readers in other services and in many civilian organizations and institutions as well. Shelves in the nation's bookstores today are groaning under the weight of " how-to" leadership books purporting to reveal the secrets of how to succeed in one career or another. Most do not last. Only a few stand the test of time; this promises to be one of them. Lieutenant General Bradley C. Hosmer, United States Air Force Superintendent, United States Air Force Academy

**I'm a Teacher Too...** Brent Barry 2005-03 All too often in our great nation's history there seems to be some sort of a separation between the great expectations of the American Education system, the greatness of our masses, and the awesomeness of the Department of Defense. Some have said, "No American Educator wants a solder, sailor or airman telling them how to teach in the average American classroom."

**Space Capstone Publication Spacepower** Us Government United States Space Force 2020-08-11 This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

**Women of the Military** Amanda Huffman 2019-06-12 Women of the Military is a compilation of 28 stories of women who have started their path to military life, are currently serving, separated or retired. There are 4 stories from women in the process of joining, 14 stories from Air Force members, 8 stories from the Army, 1 from the Navy, and 1 from the Marine Corps. Women have served in the American military since as far back as the Revolutionary War. As years passed the role of women in the military has grown and changed. In 1948, women were allowed to serve in the US Military outside of war periods. During the Vietnam War, Cmd. Elizabeth Barrett was the first woman to hold command in a combat zone. In 1976, the first woman attended a military academy. In 1998, female fighter pilots flew the first combat mission. And in 2016, after years of women serving in combat roles during Operation Enduring Freedom (Afghanistan) and Operation Iraqi Freedom, all jobs were open to women in the military. There is such a rich history of women serving in the military. And while at one point in time most women served in the role of a nurse. Today, women are a part of every job. The role of women expanding military wasn't by chance. Instead, it was from women proving over and over again that they were a valuable asset and could be used and relied on in the field of battle. How do we know what happened beyond the highlights written in history books? I wanted to answer these questions so I started a journey. A journey to hear the stories of military women. Today I host a podcast, Women of the Military, where I get to talk to women who have served in the military. But before the podcast, my interviews were back and forth on paper. I have put together these stories. Women who have served as far back as Vietnam and as current as those entering the military in 2018. Stories from women who have served in the Army, Air Force, Navy, and Marines. If you've ever wondered what it's like to serve as a female in our military, you need to read this book.
